## Tax Debt Register

### Details in the Tax Debt Register

Business ID	3243196-4
Company name	CDN Licensing Finland Oy
Taxes owed	No record of tax debts.
Negligence in filing tax returns	No register entries that would indicate non-filing of the Return for Self-Assessed Taxes.

Last update 31.07.2025

### About the register

The Tax Debt Register is a public service allowing anyone to make enquiries on outstanding tax liabilities and non-filing of tax returns. The enquiries may concern businesses, self-employed individuals, and estates (of deceased persons) operating a business. Debt consisting of unpaid car tax or excise duties does not show in the Tax Debt Register.

The register shows companies that owe at least 10,000 euros, or that have shown negligence in filing Tax Returns for Self-Assessed Taxes during the last 6 months. 'Negligence in filing' means that Returns for VAT, for withholding and employers' health insurance have been filed late or not filed at all.

Registration entries are based on a screening of Tax Administration databases, performed regularly at the end of every calendar month. The company is removed from the register immediately after the settlement of the debt has been received, or after receipt of the Tax Return for Self-Assessed Taxes.

The latest update of the Tax Debt Register is the date when the details were last checked against the Finnish Tax Administration's data system.
